

City of Madras Trails

- The Willow Creek Trail System provides a non-motorized form of transportation linking residents to downtown commerce, area schools, churches, and other recreation.
- Currently, the Madras loop consists of nearly seven miles of paved trail.
- The City leverages resources through grants, agency collaboration and private partnerships to implement the City's Bicycle and Pedestrian system goals.
- Some of our trails have incorporated the Track Trails program. The Track Trails program promotes children's health by increasing physical activity. Each Track Trail includes a kiosk, specialized signage, and self-guided "adventures" that include fun games and educational activities about the outdoors.
- Trails are just one of the many outdoor recreation efforts that are helping move Madras closer to its goal of being one of the most livable communities in Central Oregon.

***We are a vibrant, responsive
community where you can
thrive and grow.***
